Brokerage of New York, LLC

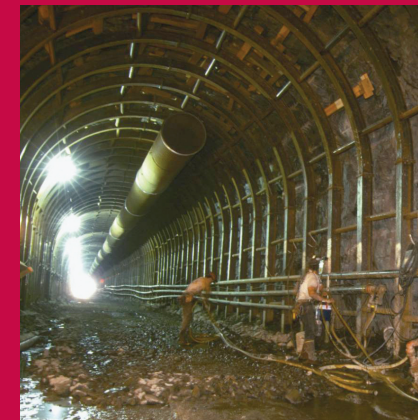

OCTAGON TOWER

The landmark Octagon Tower, built in 1839, is the centerpiece of a new mixed-income "green" apartment community on Roosevelt Island. This milestone built by Gotham Construction, a New York market leader for more than 100 years, also showcases the talents of project developer and architect, Becker + Becker.

CITI FIELD – THE NEW HOME OF THE NEW YORK METS

Inspired by Ebbetts Field, Citi Field, the new home of the New York Mets, is a landmark for modern times. This extensive project, managed by HuntBovis, one of the city's foremost sports construction specialists, will result in a 45,000-seat modern, fan-friendly stadium in a classic design. Construction of this \$800-million plus project began during Summer 2006 with demolition, excavation and the driving of nearly 2,800 steel piles. It is scheduled to be completed by Opening Day 2009.

2ND AVENUE SUBWAY

The 2nd Avenue Subway will be New York City's first major expansion of the subway system in over 50 years. The project will dramatically improve travel for both city and suburban commuters. Initiated in April, the \$3.8 billion first phase encompasses tunnel construction, track installation and station finishing from 96th Street through 63rd Street. The project is a true boon for the construction industry. During the initial phase alone, it will employ hundreds of people around-the-clock for several years.
